Membrane Solutions for the Laboratory

User friendly bench top laboratory membrane device for various unit operations like microfiltration, Ultrafiltration, nanofiltration and reverse osmosis.

Applications such as fractionation, purification and concentration of molecules can be tested. The Triple System is based on a unique designed membrane & various candle.

Features and Benefits

- Speed control of circulation pump for different velocity of fluid
- High operating pressures
- Cooling/heating jacket on tank for temperature regulation
- Wide range of membranes available
- Variable structure of ceramic membrane
- Optional HMI interface with data logging

Applications

Chemical Sector

- Acid/Caustic recovery
- Solvent exchange & recovery
- Polymer purification & concentration
- Condensate water purification

Bio fuels Sector

- Organic acid clarification & purification
- Organic acid concentration
- Sugar clarification & concentration
- Ethanol purification
- Condensate water recovery

Bio-pharmaceutical Sector

- Fermentation broth clarification
- Enzyme & protein concentration
- Peptide concentration & de-salination
- API purification & concentration
- Solvent recovery or exchange
